DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-37 and 45-57, drawn to a printhead, classified in class 347, subclass 49.
- II. Claims 38-44, drawn to a method of printing, classified in class 438, subclass 70.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Invention I can be used to manufacture color filters in class 427.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. If the applicant elects Invention I, the invention is further restricted as containing claims directed to the following patentably distinct species:

Species I, illustrated in Figs. 2a and 2b.

Species II, illustrated in Figs. 3a, 3b, 4a, and 4b.

Species III, illustrated in Figs. 5a and 5b

Species IV, illustrated in Fig. 7.

Species V, illustrated in Fig. 8b.

Species VI, illustrated in Figs. 8c and 8d.

Species VII, illustrated in Fig. 8e.

Species VIII, illustrated in Fig. 8f.

Species IX, illustrated in Fig. 8e.

Species X, illustrated in Fig. 9.

Species XI, illustrated in Fig. 10.

Species XII, illustrated in Fig. 11.

Species XIII, illustrated in Figs. 12a and 12b.

Species XIV, illustrated in Fig. 13.

Species XV, illustrated in Fig. 15a.

Species XVI, illustrated in Fig. 16.

Species XVII, illustrated in Figs. 18a and 18b

5. The species are independent or distinct because each species discloses a different embodiment of the invention.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
